

## Responsive Web Designing (RWD)

Introduction of portable devices (such as Tablets, Smartphone, Notebooks, etc.), increase in the number of mobile users and internet across the globe, all this has given a dramatic shift in the demand for mobile friendly websites. When it comes to designing for such portable devices then Responsive Web Designing (RWD) is the perfect solution.

### What is RWD?

Responsive Web Designing (RWD) refers to an integrated approach of web designing through which easy to use and compelling websites are formed. That is to give the users an optimal viewing user experience over their portable devices in terms of smooth reading & navigation with minimum scrolling, pinching and zooming.

HT INDIA LABS is the sole institute in Delhi-NCR which offers training in Responsive Website Designing. The institute proffers advance training and congenial environment to those who are passionate about learning this new dimension of the mobile web designing.
